| Comments | i am using this for sniper screening, so if this isnt appropriate please let me know, i need it to be highly flexible and basically be able to be wadded up in a pack, be able to be thumbtacked in place and prevent someone from afar to be able to see past it. |

Comments the top of the free standing structure would be considered a bow it is very
similar as if someone were building a boat upside down. This in the past has
more or less been the top part of the canopy netting we had brought. Which had
issues regarding the size it never fit right. Any ?'s plz call me @
203-809-7397. Thanks Debra Parkmond.

I have stucco/flagstone columns. I have ordered 8 Fiberglass rods for the 4 panels. I am not sure if this is what I need. Watching the video, seems i need 2 for each panel to keep them straight? Please notify me if this is incorrect.
Thanks!

Comments We plan on tucking the outside edges into vinyl siding. They should be able to stay tucked at all times as we will just open from the center & pull to the sides as we need. If you have any suggestions for keeping it tucked we'd be happy to have them. Can't wait to receive these & be able to use our deck into the evenings...thanks!!

Comments Panel 1: 5-5 wide x 86 tall, Panel 2: 19-1 wide by 86 tall, Have question on panel one which starts on a clapboard side of house. Should we add inches to the beginning height for when we velcro it to the clapboards? You can call my word cell at 207-557-1516. Thanks.

Comments Aaron,
Please Vector in on the heights - track is installed at exactly nine feet off the
vector deck.
Downside to Fedex ground is we've never found a lesser service - I have all but
heaved them out of our distribution facilities (500 -1000 pkgs a day) They
vacilate between delivering to the wrong address (my last order of tracks) or
they just don't and I have to either drive out there or do a UPS call tag to their
teriminal.

Comments This message is for Matt:
I am re-ordering 3 New Black Shade panels
Size is 163 inches width, 98 Inches height.
Per our conversation, I have added 4 inches to each panel. If a discount can be
given (since I misunderstood to add extra inches for binding on the first order),
I would appreciate it. Thank you, Glenda

Comments The Height from floor to ceiling is 102.5 inches. Please cut to fit that. Does it
need to be shorter to account for tracking mechanism?
Can you please have it delivered by June 29, 2012. Note to shipper OK to

Comments

1. Panel 1 needs velcro - black loop sewn on each vertical side.
2. Panel 2 needs velcro- black loop sewn on the left vertical side.
3. Info only: Panel 2- right vertical side is where we will be putting the fiberglass rod and magnets for a door.
4. Please provide WHITE hook velcro with special glue so that we can mount it on our vinyl columns, enough for all three vertical sides that will have loop velcro sewn on.
5. Panel 1: on the bottom edge, could you sew on an 8" piece of black loop velcro, centered at eight feet from the left side of the panel. Could you also include 8" of white hook velcro to go with it. (this will secure to the bottom of the panel to a column we have in the middle of the long panel.

Comments I have been working with my buddy Aaron, so please direct this order to him.
(I am sure he things i fell of the face of the earth, just been busy... :) Due to
complexities of length of curtain in certain areas, I am purchasing the tracking
first then will buy curtains after installation of tracking to get more accurate
measurements for curtain length...Thanks!
