Comments I love my curtains, so far! I just needed some more magnets to keep them closed. I guess I have a few more openings than the normal order.
Thanks,

Comments Panel #4 of first set and Panel #1 of second set are designed to hang together and provide opening to porch steps with fiberglass rods. I have a 3-sided porch with an off-center stairway and am making one side of the netting an INTERIOR hang, while all the others are EXTERIOR hang, which explains the difference in length of panel #1.

Comments Hi Kurt,
My parents decided to order a new panel in the heavy weight ivory netting. I assume the finished height (including finished edge) will be 114" . I actually needed it to be 113 1/2" if possible.
Thanks, Lori 916-941-4989

Comments This is for an awning application. Will use curtain hooks for top attachment.
Wasn't sure what to select in the "confirm attachment" selection - I selected
raw netting. Please include curtain hooks if you supply them. Thanks.

Comments The height of both panels is 111 inches on the left side and 109 on the right side. Does that matter? Do you just make the length 111 inches on both sides?

Comments Hi Denise!
We love the curtains! You guys did a great job. Thanks to all of your folks, it's helping us enjoy an unused portion of our home. It's like we've added an entire new room! It's the cheapest re-model we've ever done! Again, the quality and workmanship is outstanding, and we really love them. Thanks again! Dave
P.S...is the shipping really \$22.00? Can we work on getting this a little lower?

Comments Please double-check my measurements. I have a 4 sided exposure. I want only two panels. Measurements are 134.5 for the left and right sides, and 168.5 for the front and back sides. (I have asked for 90 degree corner tracking b/c I want to be able to swag curtains in the back corners, but have openings in the front left corner and the back right corner.

Comments Panel 1 WIDTH (feet) : 12-ft(+\$122)
Panel 1 WIDTH (inches) : 0-in.
Panel 1 HEIGHT : 122-inches
I am creating a structure on my patio which has a curve in the retaining wall.
The above panel is for my top piece, but L side is 10' and the R side is 7'8". I
wasn't sure how to indicate that in the standard form, so I gave the longest arm.
Panel 4 WIDTH (feet) : 10-ft(+\$105)
Panel 4 WIDTH (inches) : 2-in.
Panel 4 HEIGHT : 96-inches
This panel is my "doorway". Can this be split up the middle to allow for easier
access? Also, should I have added some inches to allow for closure? Thanks
for your help. This is for my husband's Father's Day present and even if it's
not up on the day at least the frame is, so he knows it's coming!
Cordially,
Dawn deVillasana

Comments I asked for 3 separate pieces to make it easier for me to handle but in total I figured I needed 144" by 20 feet. I hope you don't mind doing it as 3 different pieces. If it's a problem just make it one 20 ft. length. I'm going to cut it down to fit various Earth Box and garden sizes.

Comments the opening is a 104 inch high by 40 inch wide doorway, so the curtain does not have to be flat (taut), so i ordered 48 inches wide. is that ok? Also, most likely we will leave one side unattached for ease of moving in and out. but please make both sides (plus the top) attachable (velcro). thanks

Comments This order is for a patio door. we would like two panels, each 16" wide (the hole we want to cover is 31 5/8 wide) and 72" long. the panels need to be mounted at the top and sides with the velcro and be able to interlock together with the magnets so that people/dogs can easily walk through it. Please contact me if anything is unclear. Thanks

Comments Would like velcro on right side so the right end can attach to siding on house.
Are all snap carriers mounted into the curtain and ready to feed into the track?
I'm assuming yes as I did not order snap carriers. If I am wrong, please contact me.
This is a single panel install with entrance on left side. Intent for left side is to tuck the curtain end (with fibreglass rod) into the vertical corner piece of siding on house. Right side stays fastened with Velcro. Pls call or email with questions. Thanks!!
PS I found a bug in your website that might lose you a few dollars. Send me an email address and I'll explain.

Comments hope I measured correctly. I'm not really the projects type.
pls attach the velcro to the binding. I have vinyl siding at both ends of the
panel.
thanks
