Comments Kurt:
The mailing address is like this:
Gaby VIREEYE
Residence Le Pirate, #133
Route de Sandy Ground
Marigot, St. Martin 97150
Guadaloupe
Don't put FRANCE in the address, even though it is part of France, as it would go to France first and then come to the caribbean. Thus, charge me accordingly for postage. It would be prohibitive to send UPS or Fedex -- think it probably would be \$50, so just first class international mail is the best. It will arrive in 2-3 weeks. THANKS. Email me if question or problem. FYI...I don't need the metal hooks, I just need the plastic carriers. So, please keep the hooks so the packet isn't as heavy!!! Need a total of 25 more plastic carriers. They look great. Thanks. Denis P. Edeline

Comments We will be installing the curtain on a track, however we do not require the track sending with the order as it would be too difficult for us to then take over to Spain. We are hoping to purchase a similar track once in Spain. We do however require the gap coverage valance and the hooks with the curtain please.
Kind Regards
Andrea Scott

Comments Could you please cut the panels to be 16' 4" and 5' 3"? Also, I would love to have Velcro stitched in to one side binding of each panel (in order to attach it to the walls of the porch). Is it possible to have some extra length of the opposite Velcro to attach to the wall itself? Thank you so much!

Comments This is a special order. I already place an order (ref:
yhst-66811115135782-2080) and I want to add this order to the existing one.I
have a window that I want to cover with a mosquito. Will you please cut the
panel as follow: 57 inches (width) and 59 inches (height). Please bind all 4
fours sides for a velcro attachment. Let me know if there is a problem with that
particular order. Thank you.

Item	Code	Qty	Unit Price

Comments I am using this as a sort of awning/screen on an apartment patio. The people upstairs have a bunny that eats and um, everything else they do, on the balcony above us. Every day I sweep piles of pellets and yummys and food out of my patio. So. I can't wait to sit on my patio without fear of being rained on by bunny crap.
One panel...12 ft wide, and 16 ft long...velcro at the top and bound on the sides and bottom. I am hoping that's what I have ordered. Please call if I have NOT.
LOL Thanks!

Comments There is one side to patio spanning 22ft-9 in with 2 columns equally space. Cut panels #1 and #2 to 11ft-6in for "outside hang, flat roof line". Exit in middle of two spans. The Height should be 102in. Both to be mounted with velcro to vertical fascia outside columns on patio. There is a 4 ft opening on side of patio thru a breezeway into garage and side exit. Cut panel #3 to 4ft-6in, to be mounted on track on the ceiling (inside hang). Floor to ceiling height is 9ft-0in. Cut height and bind to meet required trim.
Mosquito mesh, All 3 panel to be cut and bound for heights see above. Fascia & ceiling are wood, sides are brick, sheltered mild wind, photos available if questions. call cell 318 401 0874 if questions. Thanks.

Comments On the 10' section, the actual height is 88" on one end and 85" on the other. If
you can change the height 3" over the span, that's great. If not then use the
longer length. I was planning on adding 3" to all height's for the tracking and
overlap with the floor, so it would be 88" on one end and 91" on the other. The
other two larger panels are all 85" actual height, so you can cut them at 88".
The 10' panel is also going to be velcroed at the top, where the other two
panels will be on tracking. I called a few days ago, but had to finalize my plans.
I am leaving the country tommorow, for a few months, so my wife will be
installing the netting. Can you call her when the order ships and explain how to
install correctly. She's pretty handy, but yall's help would be greatly
appreciated. Her number is listed on the order. Thanks,
Derek

Comments Actual height of opening is 81" (80.5 +/- 0.5), added 1 inch for tracking as suggested ==> 82"
Can you send a few extra scraps of curtain if you have some lying around--3-4" square or so--to deal with one irregular pipe which will be above curtain track? Not worth re-engineering the whole thing over...
Please advise when shipping and use signature release.

Comments I am not sure how much slack to allow on the width of each panel. Please
advise if the curtain should be tight or loose.
Panel 1 - Height from floor to wood ceiling is 108 inches. Width of opening is
55 inches.
Panel 2 - Height from floor to wood ceiling is 109 inches (for some reason the
building made it different height). Width of opening is 124 inches.

Comments Received previous order and am now enjoying a screened patio. Thank you.
The marine snaps are excellent and thus I need a few more.
Suggestion: offer the male half with fabric mounting (vs just the screw) option

Comments Kurt - this is the special order for the farm equipment that we talked about a
few weeks back. Sorry for the delay in getting this order into you. Do not send
any paper invoice to a street address. An electronic invoice will be fine. Please
note that the billing address is the ALTERNATE billing address that I have on
file with my credit card company. This is the address back home on the farm.
Call me at 706-506-0204 if you have any questions.

Comments We spoke on the phone about a week ago about a screen enclosure for our
 sailboat. We have decided that we have to design and implement
 simultaneously, and since I sew, we think we can manage. I'll send you a
 picture. Please let me know if you have any hints on cutting or sewing the
 noseeum fabrics, and thanks for your help. If we are successful, sailboats may
 be a new market for you.

Comments Opening is 10 feet 6 inches wide, 80 inches tall. The opening has no railing. I
am concerned that the wind will blow it. I was thinking that maybe the curtain
should drape on the floor so that I can put some weight on it to hold it in place.
We would like you to bind it for us because it is the no-see-um fabric. Please
assist us in determining the length at which to bind it. The above measurement
is from the ceiling board to the floor.
I live in Decatur and will pick it up. Don't charge me for shipping.

Comments If you offer cutting services, please cut this material into two equal panels, each
60" wide and 8' long. I am planning to make two simple curtains, which I will
attach with velcro, to a metal double glass door frame in my art studio. Nothing
fancy...just something to keep bugs out so I can leave the doors open in
summer.

Comments Please cut panel 1 to 20ft -8in, panel 2 to 11ft-8in, panel 3 to 3ft-8in This
comes with the tracking system, correct? all I need is straight tracks. no corner
tracks. Also on Panel 1 if it could be cut down the middle so that it can be
pulled back like curtains to both sides, the same on panel 2. Leave Panel 3 as
one panel please.

Comments Kurt Jordan, This order is for my Marine Sniper son. Thank you for providing
free netting when required to our men! Some friends are chipping in so we will
pay for this original order and SOMETHING can get on it's way to him. I'm in
a hurry now that I understand what it's for! Feel free to add info for him on
fastenings etc. Thank you for hooking us up with the Navy Seal also. His
knowledge should be very valuable. Susan Malovrh

Comments the 30' panel can have an extra 6" per your ordering instructions. so, please
make it 30' 6". the shorter panel is already considered.
fiberglass rods should be 88"
I'm so excited! Can I get this by April 26th? It is for our farm house porch and
we will be going up early on the 27th. I'll pay the additional for faster
shipping!

Comments Actually the exact dimensions of my Patio is 124" X 153" (height X width). I
 want velcro all around my screen. Does 127" X 156" (13') is OK or I should
 increase the size of my screen? Thanks in advance for your help.

Comments Hello,
YES! I had to order a 5' wide panel for a 3 foot wide doorframe. Can I change
that to 3' 6" please!!
Let me know what the new cost would be.
Thanks so much! Love your products.
-Mark

Comments Could the top velcro strip that glues to my porch be white since it is going to be stuck on white vinyl (even tho the curtain is black)? That way when I take curtain down for winter, the white velcro strip attached to my porch will not stand out (like black would) and match the white vinly better. Thanks- call me if you dont understand what I am saying.

Comments Hi. Are you able to stitch two panels together for me ? I would like two panels.
Panel One to be 24 foot wide and 28 foot long. Panel two to be 24 foot wide
and 22 foot long. I have calculated that to do this using your standard 12 foot
netting, I would need a total length of 100 foot, with two lengths of 28 foot
stitched together to give a width of 24 foot, and two lengths of 22 foot stitched
together, to give a total width of 24 foot. Please let me know if this is easy for
you, otherwise please just send a total of 100 foot and I will stitch myself.
Thanks

Comments The actual opening dimensions are 20'4" and 16'10" and 8 feet high. I want to use track on top, snaps at bottom -- extra heavy hem for snaps?...and magnets one side and velcro the other vertical side.
I have sent several emails and the recommendation is a special order commercial mosquito black that is high cost so I priced no-see-um as the option. please verify parts, I think stiffeners on the magnet side - not the velcro side--hemmed with velcro? I ordered extra stuff to try and cover changes in installation and get the number up to get to the higher cost material
405-818-6988 Rick Bostian

Comments Hi Kurt,
I am looking for 2 large samples, hopefully at least 4' x8 ' of 1.) Raw mosquito
mesh in white and,
2.) Raw no-seum mesh in black.
Many thanks
:Les

Comments The first curtain is 123 inches long.
The second curtain (different porch) is also 123 inches long. No cuts need to be
made lengthwise, just binding is needed. Thanks! 713 502 5632

Comments I need more! Please bind the bottom to match my order last week. I decided
they will look best if I curve them outward.
Question: I will have the two panels meet like an entry. Are magnets the best
way to close this?

Comments We are so happy with our mosquito curtain (order
 yhst-66811115135782-2512)!! It arrived so quick, was easy to install and we
 love it - its beautiful!! We spaced the carriers 4" apart but ended up 1 short so
 we'd like to order 6 additional carriers to have some extras. We will
 recommend this product to everybody we know and will send pictures soon.
 Thanks again,
 Rick and Kathy Chapman

Comments I want to attach this to an awning, however, your site didn't show an
awning(with material). I probably should wait until the awning arrives next
week.....
But if you have any ideas about how to attach it to awning material its a 16'
wide x 12' length. Help me!! I aslso want to attach on only one side of the
awning a sun blocking material or shade becasue I have skin cancer -it was
malignant and I don't want to go throught that again! So I have to be creative
with this endeavor....
Thanks! Janet Meehan - Marietta, GA

Comments Thanks again to Kurt for sending out the replacement panel for the one that had
a flaw in the fabric. The center "seam", where our (2) 26' panels meet, does
not like being held together with magnets..when a breeze kicks up, they come
apart...so we're ordering 135's to bring the track in to the center post and secure
with marine snaps. Our porch looks fantastic...will be sending digital photos
soon! Thanks again...great company!
Kathy M.

Comments I spoke to you earlier my name is kathy moore and we have the pergola from shade tree. We think we can mount the track to the actual beams of the pergola. The beam width on the bottom is about 2" which should allow us to mount the track there. It will hang from the middle of the beams. If this does not seem possible please advise. Day 908-423-5443 and evening is 908-8357870.
Thank you for all of your assistance.

Comments I would like the curtain to be binded. Height 9ft 3in. This is for an outside
mount which I have measured from top of soffet to 1 - 3" below cement porch
flooring.
My porch is a simple covered porched that only has one open wall. I choose an
one panel siding track of 35 feet to enclose since entry is at one end. Please call
me to confirm proper application and supplies at 734 925 2585

Comments The curtain is going to be secured using velcro - do you have the stiff kind of
velcro that can be screwed to my header ? - I would prefer this over the
adhesive [allergies to adhesive] The tracking I'm ordering is for a different
project. Thank you !

Comments Each panel goes into a 12 ft wide opening, so I was told to add 4 inches overlap
for a total of 12' 4".
The height to the header is 104", I added 1 inch for the tracking. Do I need to
add length for the binding to overlap the ground? I sent some pictures to Kurt
Jordan last week. Cell phone is 732 241-7338 if you have questions. Thanks,
Pete

Comments Concrete Patio is 66" deep and 107" long. Ceiling is flat but patio is 90.5" at the wall, 91.5" midway and 92.5" in the front. Length is all 92.5" (dimensions exact).
I have a coupon code but it is in my office. It took me too much time to do this order, especially, Quantities for carrier. You MUST talk to your web designer to put quantity. I was almost ready to GIVE UP. At least have boxes of 10, 20, 30 like you have for anchors. I assumed I don't get any and decided to buy 40.

Item	Code	Qty	Unit Price

Comments We want to order the curtain for the track-hanging method, however, we
already have the tracks mounted & do not need them at this time. I hope I am
correct in thinking that three sides will be bound and the bottom is raw. Please
attach track part to top. Thank you

Comments Is there any charge for cutting the 144 inch width to 72 inches (so I would have
 two rolls of 72 inches wide each)? I can be reached at 845-223-3734,
 Bob Sherer

Comments I have decided to not go with the solid span - in order to have maximum flexibility.
For the panels under the \$266,70 section need to be 8 feet in height.
Span 2 needs to be cut 7ft-8in wide
Span 3 needs to be cut 7ft-6in wide
For the panels under the \$370.05 section need to be 8 feet in height.
Span 1 needs to be cut 7ft-9in wide
For the panel under the \$131.30 section need it to be 8 feet 8 inches in height.
The challenge I have is where to put the opening cuts for the entry points. The first 10 foot wide panel (Order 266.70 span 1) is an entry/exit and the 15 foot wide (Order 370.05 span 2) is an entry/exit. I imagine just putting the slit down the middle would be best.
All the other spans would be "walls". If you can add marine snaps to the panels that would be great.
Thanks,
Rebecca

Comments The actual length of the porch is 38'9" but I know you need to add 3-6" on each end. We will be using each end for doorways as there are steps on each end of the porch. Will 40' be too long? If so please adjust to what you think is the best length, I don't want a whole bunch of fabric hanging off the ends of the porch. Thanks!

Comments Please make Spans 2 and 3 (the 2 smaller panels) to measure 7ft-6in in width
so I will have extra where the panel meets the house.
I am doing an inside velcro hang. The inside ceiling facing and the ceiling are
white. Can I get the velcro that attaches to the ceiling facing in white instead of
black so it blends in more when the curtain is not in place? If possible I would
still want the velcro sewn to the curtain to be black. If it will be an additional
cost to do the velcro that way, then make all of the velcro in white. I would
still want the bindings in black.
Thanks,
Dorothy Sacksteder

Comments Order is for porch on cabin. Porched is sloped at the top on 2 sides of 97" to
80" within 8' width. Please call and discuss how we could deal with this
irregular cut. Call as early as you wish. Thanks, so glad to find you guys...I've
been looking for this solution for six years.

Comments Please cut panels as follows:
Hi,

I am attempting to use the no-see-um curtains to replace the screen on my existing screened-in porch (not a new build). I need curtains to be all black no-see-um, with tracking at the top and magnets for the bottom (top & bottom bound by you). All measurements below are measured on the inside of the opening. All mounts are inside-mount. Below are the curtains I am requesting:

1) Back Porch Left-Side Screen Door Black No-See-Um:

a. Top Panel 30 inches wide x 37 inches long/tall (inside opening measured); would like straight tracking, inside mount, with one single curtain panel (30 inches wide x 37 inches long) that opens from left to right (e.g., the panel opens to the right-hand side of the opening; if there is only one opening mechanism (like a blind), I would like it to be located to the right hand side of the right curtain panel. I would like you to bind the panel so that it can be opened freely with the tracking mechanism, but when closed will keep the bugs out all the way around the inside opening of the top panel (bind top & bottom - & sides?), and use magnets for the bottom. I would like the curtain to stay in place (like a screen) in high winds and am interested in marine snaps for this purpose, but not for daily use. If you sew on the marine snaps that is great, if not, I will order the marine snap kit & attempt it myself.

b. Bottom Panel 30 inches wide x 29 inches long/tall (inside opening measured); would like tracking, inside mount, with two curtain panels (left 15" & right 15") that open in the center, e.g., left panel goes left and right panel goes right; if there is only one opening mechanism (like a blind), I would like it to be located to the right hand side of the right curtain panel. I would like you to bind the panels so that they can be opened freely with the tracking mechanism, but when closed will keep the bugs out all the way around the inside opening of the bottom panel (bind top, bottom, & sides?), and use magnets for the bottom. Would like the curtain to stay in place in high winds and am interested in marine snaps for this purpose, but not for daily use (use as dog door).

2) Back Porch Right-Side Screen Door Black No-See-Um:

a. Top Panel 27 inches wide x 36 1/2 inches long/tall (inside opening measured); would like straight tracking, inside mount, with one single curtain panel (27 inches wide x 36 1/2 inches long) that opens from left to right (e.g., the single panel opens to the right-hand side of the opening; if there is only one opening mechanism (like a blind), I would like it to be located to the right hand side of the right curtain panel. I would like you to bind the panel so that it can be opened freely with the tracking mechanism, but when closed will keep the bugs out all the way around the inside opening of the top panel (bind top & bottom - & sides?), and use magnets for the bottom. I would like the curtain to stay in place (like a screen) in high winds and am interested in marine snaps for this

(Continued...)

purpose, but not for daily use. If you sew on the marine snaps that is great, if not, I will order the marine snap kit & attempt it myself.

b. Bottom Panel 27 inches wide x 33 inches long/tall (inside opening measured); would like tracking, inside mount, with two curtain panels (left 13.5" & right 13.5") that open in the center, e.g., left panel goes left and right panel goes right; if there is only one opening mechanism (like a blind), I would like it to be located to the right hand side of the right curtain panel. I would like you to bind the panels so that they can be opened freely with the tracking mechanism, but when closed will keep the bugs out all the way around the inside opening of the bottom panel (bind top, bottom, & sides?), and use magnets for the bottom. Would like the curtain to stay in place in high winds and am interested in marine snaps for this purpose, but not for daily use (use as dog door).

3) Kitchen Patio Sliding Door ½ Screen:

a. Two Panels totaling 40 inches wide x 79 inches long/tall (inside opening measured); would like straight tracking, inside mount, with two curtain panels (left 20" & right 20") that open in the center, e.g., left panel goes left and right panel goes right; if there is only one opening mechanism (like a blind), I would like it to be located to the right hand side of the right curtain panel. I would like you to bind the panel so that it can be opened freely with the tracking mechanism (or pushing through the center opening between the two panels), but when closed will keep the bugs out all the way around the inside opening of the bottom panel (bind top, bottom, & sides?), and use magnets for the bottom. I would like the curtain to stay in place in windy conditions and am interested in using Velcro and/or magnets for this purpose, but not for use on a daily basis. I would like to be able to open the patio door, leave the curtain closed, and walk through the center opening without having to use my hands (as long as the patio door is open), and not worry about bugs getting in to the kitchen when it closes behind me (also as dog door).

4) Living Room Patio Sliding Door ½ Screen:

a. Two Panels totaling 40 inches wide x 79 inches long/tall (inside opening measured); would like straight tracking, inside mount, with two curtain panels (left 20" & right 20") that open in the center, e.g., left panel goes left and right panel goes right; if there is only one opening mechanism (like a blind), I would like it to be located to the right hand side of the right curtain panel. I would like you to bind the panel so that it can be opened freely with the tracking mechanism (or pushing through the center opening between the two panels), but when closed will keep the bugs out all the way around the inside opening of the door panel (bind top, bottom, & sides?), and use magnets for the bottom. I would like the curtain to stay in place in windy conditions and am interested in using Velcro and/or magnets for this purpose, but not for use on a daily basis. I would like to be able to open the patio door, leave the curtain closed, and walk through the center opening without having to use my hands (as long as the patio door is open), and not worry about bugs getting in to the kitchen when it closes behind me (also as dog door).

5) Back Screen Porch Window Curtain & Side Screen Porch Window Curtain Black No-See-UM; could be done two ways, whichever you think is best would be fine. One possible way: Use inside mount tracking, with one single panel that will make a sharp (almost square) turn in the tracking. I would like the curtain to open from outside to inside (toward the corner of the turn). Left Span (inside measure) is 71 inches wide (to corner) and 39 inches long/tall.

(Continued...)

#2930 (continued)

The Right Span (inside measure) is 94 inches wide and 39 inches long/tall. The Second possible way would be to do them as two separate windows with two separate straight tracking inside mount curtains with magnets on the bottom, bound by you, (one panel each left span opening left to right with opening mechanism to the left of the panel and the right span opening from the right to left with the opening mechanism to the right of the panel) or it could be done as one panel for both windows (size 165" wide by 39 inches long/tall) with inside mount tracking if available in a sharp turn (corner track). Still want two ways to open as indicated above, with both outer sides opening toward the center (left panel opening left to right and right-side panel opening right to left). Please call me if this doesn't make any sense (: Thank you! Becky

Comments We ordered curtains on 5-10-07. We love them, but we have a big problem. One of the panels was supposed to be cut to 31ft-6in. (I paid for 32ft.) When we hung it up it wasn't long enough. Our end posts are wide, and we tried to make it fit, but it's just too short. Unfortunately, we also put in 2 snaps, and one of them pulled out on a windy day. We measured again, and discovered that the curtain is cut closer to 30ft-6in.! We are sending the curtain back to you today. I'm sorry that it is not in new condition. I hope you will send a new curtain cut to the full 31ft-6in., and this other stuff, too. Thank you!! Original order# yhst-66811115135782-2549 Height= 92inches & bound

Comments Curtains are to attach to a metal awning structure. I assume the velcro will be
the best method. Phone number is home number, email is the best way to get
in touch with me though. Thanks!

Comments We'd like to order in inches, and have a file that we'll be emailing which provides the exact dimensions needed. We didn't include a order for our "panel three", because it's small, and Kurt said that he'd probably be able to find scrap for it. We'd also like to order, but couldn't add it to the cart (got an error): 32 feet of the 120" raw black mosquito mesh. Please contact via email or phone with questions. Thanks!

Item	Code	Qty	Unit Price
