Comments This is for a large garage door opening for a busy restaurant. Is there anything I need to change or any suggestions?
Thank you!

Comments I measured an exact 11ft across but since I cannot attach to the apt siding above the 36" wood rail I added 2 extra inches to have a slight "wrapped edge" to keep my cats in. Unless you can give me an idea to seal the upper sides so my smart kitties cannot get out, do you think I should keep the extra 2 inch surplus? I cannot make any hole in the plastic siding to attach anything.

Comments The panel is a trapezoid. It will be velcro.
When putting on the velcro, the 9in side is on the left, and the 54 in side is on the right. It will be hung with the 9in side on the right and the 54 inch side on the left.
Measured as it will be hung, 54in left, 128in bottom, 9 in right, 135.7 in diagonal top.

Comments Talked to Kurt about sealing rafter gaps and he said he'd throw mesh scraps into my box to cover area 29 feet x 6 inches - he left a note for Matt to call me at (254) 717-5021 - also please make sure that tracking itself is black if you have it or silver - otherwise white is ok. thanks!

Comments I need 12 clips to secure the eleastic cord to eye bolts plus 2 to fix where I came up short on my intial order last year (Total of 14). I did not see where you ordered them. Running into too much wind billowing issues so I need the extra snaps to secure the bottom to the decking. Other works great, very happy with the product. Just put it up yesterday for the second season.

Comments Panel 3 is a right triangle to go over a false header for a shed roof. Panel is 33" tall and 11'-7" wide, including allowance.
 screening a 2 sided shed roof porch, inside hang. Panels 1 & 2 are track-mounted. Panel one starts at the wood house and skirts a square wood post around to the 2nd side. Panel 2 creates a small door running from panel 1 to the house.

Comments	We live in a VERY rural area, the shipping address given is our mailing address (which we pick up in the town 20 miles from our home). I don't think any of your shipping methods will get it right to our home and any shipping company outlet is situated at the nearest city, 70 miles away from our home. Please take this into consideration when choosing your method of shipping. E-mailing us all shipping details and a tracking number helps us out alot. Thanks, Dick

Comments When measuring the height of exposure starting from left to right; actual measurements were 103", 103.5", 103.75", and 103.25". Please let me know if I made a bad decision to go with 103" all around. Also,as I understand, the fiberglass rod and magnets negate the need to secure the curtain to the concrete slab, is this correct?

Comments Dear Sirs,
You mention USPS Priority Mail as a shipping option, but do not allow your customers to select this mode of delivery. I have found Priority Mail to be faster and less expensive than UPS.
I want this order to be shipped via USPS Priority Mail. If you cannot comply with this request, please cancel the order.
Thank you
Fred Wilson

Comments This is to replace one of the panels I ordered from you years ago. I assume I should order the black snap carriers as they are a better method than the old metal pins you used previously. Also, the distance from the wood header to the floor is 109 inches. The current current drags along the floor. Can the curtain be made a little shorter? I don't want to affix them to the floor and the current length drags the ground when the wind blows.

Item	Code	Qty	Unit Price

Comments

Panel 1= 90" wide x 60" tall
Panel 2= 90" wide x 60" tall
Panel 3= 34" wide x 64" tall
Please cut these three (3) panels from the 12' x 10' section i've ordered and send me ALL remnants along with the cut panels. I want to mention that my intended application is to replace the two side-walls in a poly-reinforced plastic covered greenhouse (approx 8' x 8'). The reason for this is that the greenhouse is overheating because of a lack of ventilation. Once I remove the two walls, I still need to keep the tiniest bugs out, hence the no-seeum screening. One more thing: The support members for the greenhouse are made of steel tubing. I am wondering if the magnets you suggest for door closures would be useful for me in attaching portions of this screen to the greenhouse frame. If you would like to call to discuss a suggestion OR if there are any questions, please contact me at (310)990-1636. Thanks, Joseph

Comments Please combine shipping with another of my projects. This is 1 of 2. No Mosquito Curtain label in the hem please. Actual height measurement of both panels is 102.25 inches. (I missed the panel 2 height of 103 inches in the order form) Include 4 tie back and 4 elastic cord snaop. Tag packages with Roberta. Aaron to arrange a no PST credit on the order.

Comments Please arrange shipping with another of my projects. This is order 2 of 2. This project is a little different as the client wants to achieve a snug fit screen rather than loose. They want to fasten each end, one side with marine snaps and the other with block magnets in the hem and round magnets embedded into a 1x2 board.(I can easily achieve this part). They also want to snap it to the concrete floor in several places, so please send 1" screws for the marine snaps. I need you though, to cut the height and lenght to give a snug fit that will yet not pull the hems crooked.....Here are the exact open opening measurements for each panel. Panel numbers are determined with my back against the house wall, facing out. Panel #1 is on my right, 184.5 inches long. 104.25inches high at the house and 105.25 inches high at the outer edge. This panel has 1x90 degree curved track. Panel #2 is on my left, 175.5 inches long. 104.25 inches high at the house and 105.25 inches high at the outer edge. This panel has 1x90 degree curved track. Panel#3 along the outer edge is a straight track and is 105.25 inches long. Height is 98.25 inches. Panel#4 along the outer edge is a straight track and is 55.25 inches long. Height is 98.25 inches. Panel #5 is is along the outer edge and is 85 inches long on a straight track. Height is 98.25 inches. Panel #6 is along the outer edge and on a straight track. It is also 105.25 inches long and 98.25 inches high. I require the tracking to be BRUSHED NICKLE in color. No Mosquitocurtaun label in the hem. Aaron is arranging a credit on the PST. Please allow 2 tie backs per panel. Send 4 elastic cord snaps. If you would tag each panel with its # that would be great! Tag packages as Ewart. Steve had indicated that you would send me a resellers sample kit with my first order, if you have not already done so, please include it with this shipment. Cheers!

Comments Aaron,
 Thank you for the samples. Your netting appears to be all that you advertise it
 to be. It will be perfect for my "Bug Tent". Many thanks ,
 May Taylor.

Comments Note, I bought your curtains last year and I don't like the fibreglass rods - I took them out at the end of the years so I can fold up my curtains and store them away for the winter. I like the concept of the tether clips, I give that a try. My next suggestion would be to develop something to store them in.
