Comments Please call if you think I may have forgotten something or made a common mistake.
I have an L-shaped patio (lanai in Hawaii), one column at the corner. I intend to velcro the curtain to the top outside edge. I want to use the fiberglass rods on both sides against the house, with magnets and the marine snaps to reinforce the top and maybe the bottom edges. Thanks or Mahalo!
Please advise if there's an increase in shipping to Hawaii.

Comments this is for outside mounting on a 42" x 84" door and inside mount on a french door 72"x 84" . They will work for a curtain to keep out flyes and bugs at our beach house.
should I have orderered other items?
thanks

Comments I prefer surface mail for delivery as there are trivial customs clearance charges and I do not run into any problems with pickup. Fedex is also OK but there are often hassles with UPS for rural delivery and/or exorbitant handling charges.

Comments i have xxx impact doors which do not allow for a screen door. i am using this
hung inside so i can leave the door open & the dogs can run in & out. i did not
see/find any weights to keep the bottom down.

Comments Please call me to make sure I placed the order correctly. We have an odd shaped hexagonal gazebo (see different sizes of the panels), with 6 concrete columns. Three columns have downspouts and 2 have lightswitches attached to them. I thought it best to have fiberglass rods and magnets to attach each panel to each other, but you may have a better suggestion. Your assistance is much appreciated. Home phone: 281-364-1143 and cell phone: 713-992-9898.
Thank you!
Karin Fox

Comments I am experimenting with some "Store Front" doors..these are the doors that you see in most stores. They do not have screens so this might work; so I my open the doors to let some fresh air in. The doors are at my home.
Thank you

Comments Panel #3 is the side panel and there is a slope to the overhead structure Please make this panel with a slight taper at the bottom so that it is 97" to 95" going from left to right looking out of the screen. Straight across the top, 97" long on the left and 95" long on the right. Can you sew the stitching on the 95" side in black as it will be against a brick wall. email me if you have questions.

Comments I want to Velcro the right side of panel 2 to the left side of panel 3 (panel 2 over-lapping panel 3 forming flat seam). This seam meets at a column on my center exposure and I will use elastic cord at each column for support. If this is not possible please let me know by phone.

Comments *****This order is for Velcro and Track***** i was only able to select one option above
Panel 1 = track; panel 2 = velcro; panel 3 = track; panel 4 that has a width of 44 ft = velcro;
panel 4 that has a width of 6'4" = track.
I would like Black velcro adhesive tape instead of white.
If there is any chance i have missed anything i would really appreciate you emailing. I really took m y time with this order and had my husband measure and measure.
Thanks so much i am very excited to recieve this product, our mossies are HUGE and thick in the air in the spring where we live in Canada.
Beverley King

Comments I was not sure how many carriers I would need, so I went with 30, please advise if you recommend more. I did attentional order the heavy duty tracking even though it is under 10 foot in length. If I need something more, my best number is my cell at 617-840-7104. Thank You! Gary

Comments Don,
The shipping formula charged you a bit too much so we backed out \$6.60. It is
an expensive box to ship since it hits the "bulk" box catagory.

Comments Can you set up the velcro so that the two panels will attach to each other on one side, with the length of the side 118 inches? I need to be able to walk between the panels, but I want to be able to close them off entirely as well. For the two panels to attach to each other on one side, I would need the firm, scratchy velcro on one panel and the fuzzy velcro on the other panel. Again, this needs to be on one of the long sides of each panel (118" side).

Item	Code	Qty	Unit Price
Heavy Mesh Mosquito Netting Curtains Color = Black Panel 1 HEIGHT = 118-inches Panel 1 WIDTH (feet) = 4-ft(+ \$60) Panel 1 WIDTH (inches) = 0-in. Comments Hi Kurt,
I decided to go with 5 panels instead of 4 for a nicer look. Hope I haven't forgotten anything. If so, please would you add up and let me know. Thanks so much for all your support!
Jana

Comments I'm making magnetically attached screens for the outside of my cab windows in my rv. We're going to Alaska in June and expect mosquitos and no-see-ums. Would like to have screens on the front windows so we can have the windows rolled down while in camp. This should do it.

Comments Please, 1 Panel: 10 ft x 10 ft, no frayed edges.
Curious, are you able to surge the edges for me?
If so, many thanks, I've been looking for wide roll :)

Comments On Apr 18 Kurt helped me put this order together. He also mentioned that this fall you may be offering a hard cover for pergalas. I would be interested in receiving some info if and when they are available. Looking forward to receiving your product.

Comments Thanks! I'm excited to have found you guys. I've been trying to dream up how to make my porch pretty and bug free since we moved in. I was actually looking up buying mosquito netting to make my own curtains, and there you were! Now my mosquito magnet husband will be able to sit outside with me! Thank you, thank you!

Comments The snaps have to be ordered extra for the pillars? I did order them assuming they are not included with the netting. The longest height is 106 inches (104"-106"). You stated the track can be mounted to a 1x2 which actually brings the height to 105.25 inches with the board. 105 in is OK for height? I shouldn't round it to 106?
The magnets are ordered as singles on the order sheet? You make a note of ordering them in pairs and I don't know if the drop-down menu is for single or pairs. I took it that the drop down was for single magnet? If not, I will only need half of what I ordered.

Item	Code	Qty	Unit Price

Comments This is for a recessed balcony with only one (front)open side. The ceiling ht. is 12' with a 1" wood lip at the front edge. Will this be enough to attach the velcro on to?
Thanks, Susan Topp 630-876-6763 (work)

Comments The exact height is 94 3/4". I think 95" will work because I may have to use the 2x2 to mount it onthe side. Int eh end, 1/4" won't matter too much.

Comments I am considering a project that is L shaped with total dimensions of 41' long and 14' high. This is new construction near a lake on a nature preserve in Okatie South Carolina. The community is called Oldfield and there are plenty of mosquitos and some no seeums . Our deck that extends out from the porch we wish to enclose is stone and there are no grassy areas within 20' of where the sc reens would be. This is a sunset exposure so I don't know what type of material to use. I wanted to order swags of the different types of material to hang in to get an idea of visability,bug protection and possible screening from the intense South Carolina sun. I know I am restricted by my ceilng heights. I have reveiwed the website but I have questions about the panel configurations. I will probably need 4 panels 9'wide x 14' high and 1 panel 7'wide x 14' high. If you have any suggestions please e-mail me your thoughts about the material selection. Thanks!
